EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 9, and 12 to 14 are allowable because the prior art of record does not disclose or reasonably suggest the limitations of determining a relevance of a transient by looking at a difference between a first parameter from a first window that surrounds a transient location and a second parameter from a second window that surrounds the transient location, the second window being shorter than the first window, and inserting additional parameters in the encoded signal if the difference is greater than a threshold. It is known in the prior art of audio encoding to encode audio signals with long and short windows, where a short window more efficiently encodes transients. However, the prior art of record does not disclose or reasonably suggest looking at a difference in parameters between windows having different lengths around a transient, and inserting additional parameters if the difference is greater than a threshold. Applicants' Specification, Page 12, Lines 19 to 28, describes a method of determining a relevance of a transient by looking at a difference between spatial parameters derived from a longer window and a shorter window surrounding the transient location, and inserting extra spatial parameters if the difference is significant. The Specification, Page 3, Lines 5 to 8, states an objective of providing an audio encoder/decoder that mitigates pre-echo artifacts related to parametric multi-channel encoding.

CONCLUSION

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
